Copy It

Good Job!

You got it!

- What happens when you make a **COPY** of a shape and then press **PASTE** more than once?
- What happens when you move your shape after pasting, then press **PASTE** again?

Now, try to make more copies by selecting more than one shape at a time.

The screenshot shows the Tinkercad interface with the title bar "TINKER CAD Copy It". The workspace contains three red cubes arranged in a triangular pattern. A tooltip box with the name "Matthew Bachelder" is positioned over the middle cube. The workplane is labeled "Workplane" and "Millimeters". On the left, there's a sidebar with icons for "TOP" and "FRONT" views, and a vertical toolbar with icons for selection, home, rotate, scale, and transform.

Rotate It

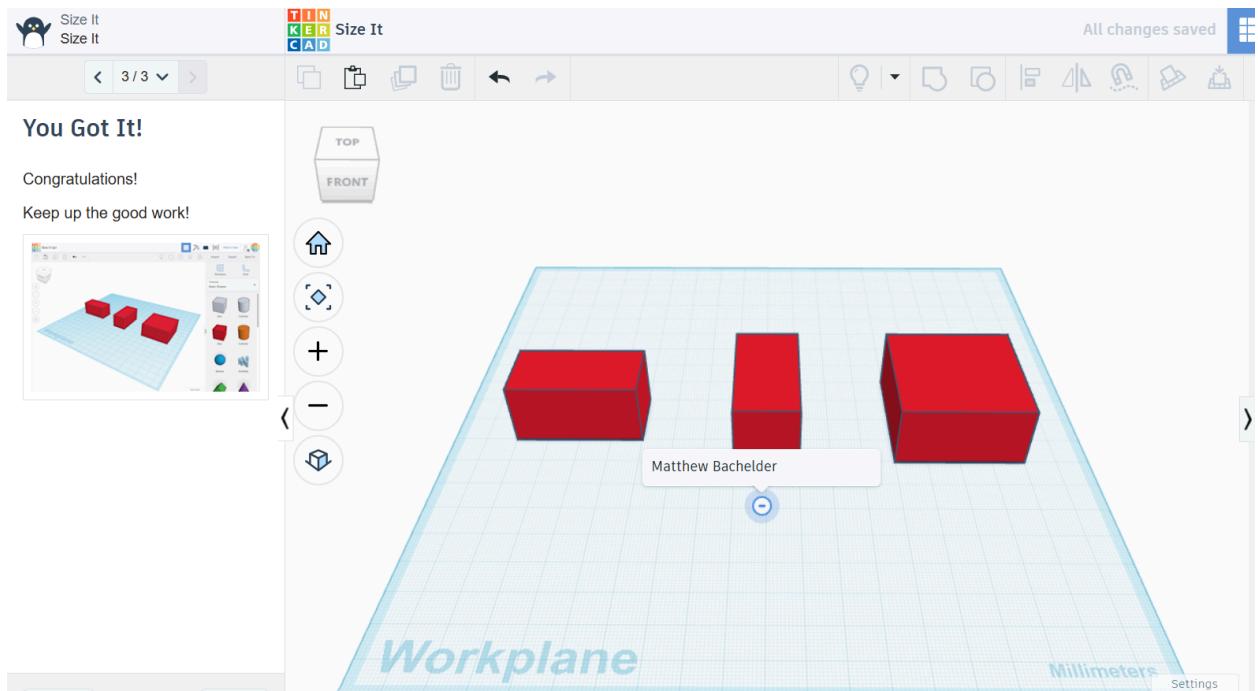

Great Work!

That looks great!

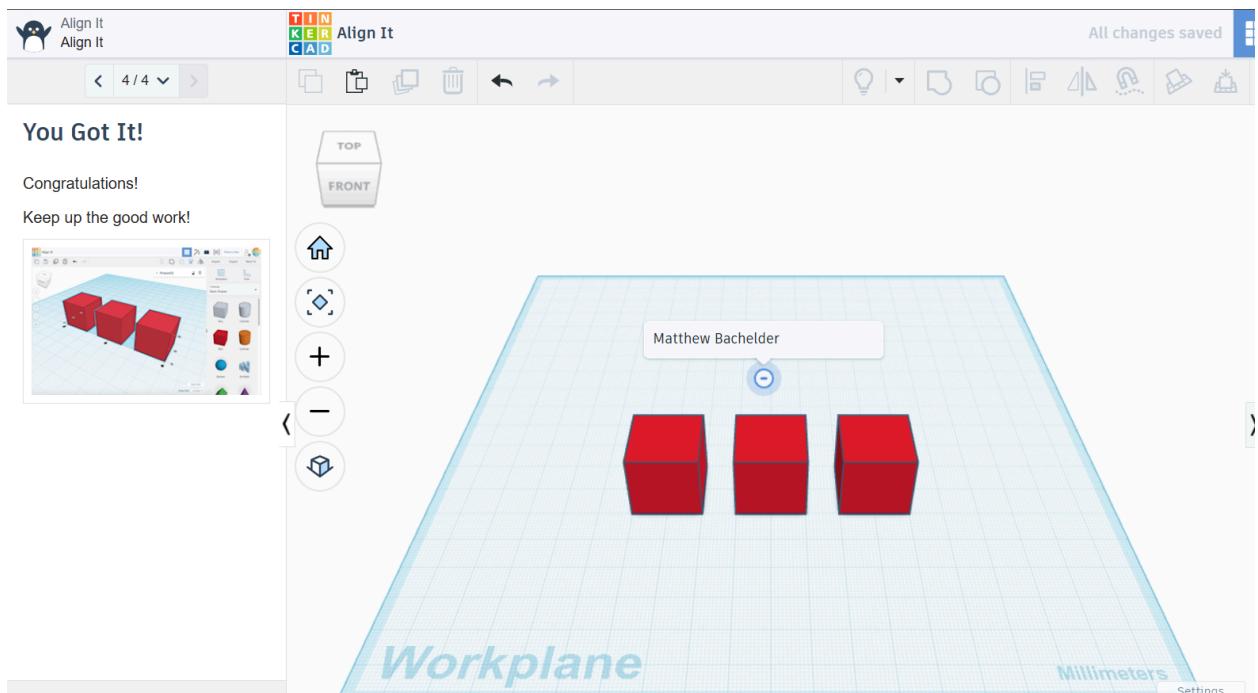

Let's keep going!

The screenshot shows the Tinkercad interface with the title bar "TINKER CAD Rotate It". The workspace contains three red cubes that have been rotated into different orientations. A tooltip box with the name "Matthew Bachelder" is positioned over the middle cube. The workplane is labeled "Workplane" and "Millimeters". On the left, there's a sidebar with icons for "TOP" and "FRONT" views, and a vertical toolbar with icons for selection, home, rotate, scale, and transform. At the bottom, there are "Reset" and "Done" buttons.
